VORTEX

BY ETERRA

Eterra's new Vortex Stump Grinder is a state-of-the-art tool with a high torque output radial piston motor, combined with a robust Direct Drive System and Aggressive wheel for increased power and cutting capacity.

VM27 | VM31

The Vortex Stump Grinder was designed and manufactured by Eterra in the USA to increase stump grinding efficiencies... Simply put, Eterra is tired of the common poorly designed, underpowered, and cheap stump grinders.

The Vortex's direct drive system is overbuilt, reliable and easy to maintain. It was designed in conjunction with the radial piston motor and the aggressive heavy duty wheel with the goal to never let you down.

Unmatched Power Delivery

	VM27	VM31
Weight (LBS)	1050	1075
RPM Range	450-700	450-700
Flow Rating (GPM)	18-30	30-45
Drive System	Direct Drive Mega Hub System	Direct Drive Mega Hub System
Motor	High Torque Radial Piston Motor	High Torque Radial Piston Motor
Width	46"	46"
Machine Compatibility	SSL Quick Attach Compact Excavator	SSL Quick Attach Excavator
Teeth (Included)	3 Rock Guards, 12 Standard Teeth
